

HANDISTAND II

STACK & STORE

The Handistand II is a straightforward, convenient hand sanitizing station for any occasion. The hollow pyramid shape makes it easy to maneuver and stack for transport or storage. The 76 cm wide square base makes it very stable and accommodates for its light weight. With the capacity to hold four dispensers, the Handistand II will be as versatile as you need it to be.

If required, the Handistand II can be staked down by driving stakes/tent pegs through the base and into the ground. Or it can be prevented from moving around by placing a bucket weighted with sand underneath.

- ✓ **Light & steady**
- ✓ **Conveniently easy to move and stack: up to 18 (without dispensers) on a pallet**
- ✓ **Can be secured with stakes or weighted**

Optional
