

# Highrise

## Why?

This restroom is built exclusively for the high rise construction market and offers end-users and operators a unique set of features. The Highrise has been designed to be semi or fully private. Adding the roof makes it fully private, and a sliding mechanism allows it to be lowered far enough to fit through standard door openings. For additional privacy, the urinal is placed inside the restroom. Overall, the Highrise has a tremendous amount of interior space and adds privacy in situations where it was impossible to have before.

The Highrise is sized to go where other restrooms cannot. With the optional roof, it is only 33.5 inches wide and 78.2 inches high. This allows the Highrise to be moved through halls and doorways to the place where workers need it most. The casters are sealed to prevent freeze up and can be greased for continued reliability. The frame and floor are made from galvanized metal to prevent damage while lifting and handling. This uniquely-designed restroom fills the need for privacy, maneuverability and dependability.

**Lift Kit (optional)**

## Why?

Ever get the request for a portable restroom that can fit inside of a freight elevator but still offers the same privacy as a standard size portable restroom? Look no further than the Poly Mini. A customer created portable restroom designed to keep its maximum height low enough to slide or roll into a freight elevator. The 'Mini' boasts the same interior and exterior features as our other standard sized units.
