

Tag II

Why?

Introducing the Tag II, Hand Wash Station. One of our most popular pieces of long-lasting equipment is the Tag Along hand wash station. Without trying to reinvent the wheel, we noticed a few small improvements that we could make to this outstanding sink. After maximizing the potential of the internal components, our engineers decided that it was time for a face lift to suite! Its rugged construction matches the high quality of the Super Twin, yet its lightweight footprint makes it simple to transport. In fact, the Tag II will fit inside most standard size portable restrooms for delivery. The days of making two trips to deliver two restrooms and a sink are over!

Color

Gray

Lift Kit (optional)

Features

Foot pump allows for hands-free cleaning, making the Wave more user friendly.

Lower unit sumped drain plug, allows for easy draining and cleaning.

Lift Kit option allows more versatility for the Tag II sink.

"Quick Fill Port" Easy plug removal with no tools required. Chain tether keeps the plug on the sink and near the point of use to reinstall.
